SNOBASH- not.... The lodge that we went to for years has closed for the winter...they are only open in the spring, summer and fall. There isn't enough snow right now anyways...we can hope we get more in February allowing us to maybe schedule something in March?? The Chester sled race with SNDD is looking to be "rescheduled" for lack of sufficient snow.

If anyone has any place besides Bear Valley that a few could run, that has snow, let one of us know so we can check it out. Ideally a trail that snow machines have been on but is not a super popular trail.

# Happy News from adopters

Hearing from dogs that we placed a while ago. It is great to get an email with a picture of a dog adopted through BASH- last year or 10 years ago and hear how they are going. When received we pass them also onto the foster home. IF you would like to pass on a story or just an update, please do....all of us that foster enjoy hearing from those that we have adopted.

She's doing well! Adopted her a couple years ago. Awesome dog., Jay (adopted from Beth in 2017)

I get stories on a weekly basis from Laura S who adopt Rome (adopted a year ago) from me and two others from Norsled.

## Siberians represented at Golden Gate Kennel Show

For years BASH had a rescue table but in recent years there have not been enough Siberians entered to get a table space for free (15 siberians need to be entered). Peggy Rusher and I both had dogs entered (JP and Sagee) Over the two days we talked to many people about the breed, the goods and the bads, where to look for a reputable breeder and why they might want to look at rescue.

### Ingredients

- 1/4 cup coconut oil
- 3-4 strawberries finely diced

### Instructions

1. Add a few pieces of strawberries to each compartment of a silicone mold or ice cube tray.
2. Using a pyrex measuring cup, melt the coconut oil in the microwave. This may take 30 - 60 seconds.
3. Pour the melted coconut oil over the strawberries and freeze.
4. When frozen, pop from the mold and store in a baggie or container in the freezer.
5. As with all treats don't over do it.

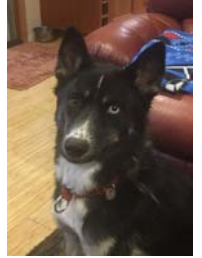

## 7 common Valentine's Day toxins for pets

- Roses. Roses are red, violets are blue, but biting a thorn **can do damage** to you—or to **pets**. ...
- Lilies. Lilies (Lilium spp. ...
- Chocolate and cocoa. ...
- Chocolate covered raisins. ...
- Chocolate-covered espresso beans (caffeine) ...
- Chocolate-covered macadamia nuts. ...
- Xylitol (found in gum)

# Rescue for February

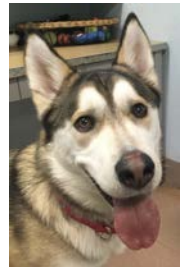

Randy Fishel [randyf@sibernet.com](mailto:randyf@sibernet.com)

Quinn Mae is a sweet and very active little girl . She is an active puppy going into adulthood. . We think she is siberian with some herding dog (smooth coated collie) in there. She is also crate trained She does bark when she gets excited, and loves to run as much as possible. She loves to do the zoomies around the back yard. She loves to play with another dog that wants to play. She also can figure out some boundries. She can sit, down, give paw and soon more as we have time. Being food motivated should make that a bit easier. She play ok with children but we would not recommend her with small children since she is a puppy herself. She would be good in a very active family or a family that needs an active dog to keep another similar sized or larger dog company.

Hi my name is Maximus. I am Maximus strong. I am Maximus gorgeous. I am a Maximus lap dog. I am just Maximus in every way possible. I was told that I was a combination of Siberian Husky and Alaskan Malamute. My foster mom thinks I may also have a tiny, not a Maximus bit of GSD in my lineage. I am Maxim us smart and know both Spanish and English. I use to have a family with three kids to play with. They tried very hard to keep me. To stay with my family I even lived in a car for awhile. I miss my family and want nothing more then a new family to love. Valentines Day is coming soon. Will you be mine.

Cash was surrendered to BASH because the owners didn't feel they could put the time into him that a puppy needs. They bought him as a purebred AKC siberian, but didn't get the papers and he clearly is not a purebred siberian. Best guess is he is a siberian/German shepherd.. He was born 9/7/19 (4.5 months old) and already weighs 47#'s. He is going to be a big dog. He is crate trained and I was told house trained. I think he is housetrained but I haven't figured out the signal yet (he did wake me at night to go out when crated) He plays great with other dogs. When you first meet him he is overwhelmed and will just stay back. Took a little time to warm up to humans but is great with other dogs. Walks ok on a leash but needs training for sit and down.
